

Claims

[c1] What is claimed is:

1. A method of fastening an electromagnetic interference (EMI) shield to a circuit board, the circuit board comprising a plurality of holes, the EMI shield comprising a plurality of fasteners corresponding to the plurality of holes of the circuit board, the method comprising:
inserting the plurality of fasteners into the plurality of holes to securely fasten the EMI shield to the circuit board.

[c2] 2. The method of claim 1 wherein the circuit board is a printed circuit board.

[c3] 3. The method of claim 1 wherein a height of the plurality of fasteners is no greater than a thickness of the circuit board.

[c4] 4. The method of claim 3 wherein the plurality of fasteners is joined to the plurality of holes by intrusion.

[c5] 5. The method of claim 1 wherein the EMI shield further comprises a plurality of fixed fittings used to fix the EMI shield to another structure.

[c6] 6. The method of claim 5 wherein the plurality of fixed fittings is of a push-button structure.

[c7] 7. The method of claim 1 wherein a height of the plurality of fasteners is greater than a thickness of the circuit board.

[c8] 8. The method of claim 7 wherein after the plurality of fasteners is inserted into the plurality of holes, ends of the plurality of fasteners are bent under the circuit board.
